Summery

I am a passionate and dedicated student currently learning ASP.NET and Angular to build full-stack web applications. I also have experience working on projects using PHP, which has helped me understand backend development and database integration. My goal is to become a skilled web developer by continuously learning new technologies and applying them through practical projects. I enjoy building responsive and user-friendly websites and always strive to write clean and understandable code.

Academic Background

Computer Science and Telecommunication Engineering Noakhali Science and Technology University, Bangladesh <i>CGPA: 3.67(currently) Out of 4.00</i>	Jan 2020 – 2025 (Final semester) BSc. in Engineering
Higher Secondary Certificate Birshreshtha Munshi Abdur Rouf Public College, Bangladesh <i>GPA: 4.92 / 5.00</i>	June 2017 – April 2019 Group: Science
Secondary School Certificate Ak High and College, Bangladesh <i>GPA: 5.00 / 5.00</i>	Jan 2012 – Mar 2017 Group: Science

Projects

1. SimpleEcommerceUsingAsp.NEtMvc

GitHub link: <https://github.com/aminulcste/SimpleEcommerceUsingAsp.NEtMvc>

Description: A basic e-commerce web application built using ASP.NET MVC. Demonstrates product display, cart features, and basic order management — great for learning e-commerce with MVC.

2. ASP.NET-CRUD-OF-PRODUCT

GitHub link: <https://github.com/aminulcste/ASP.NET-CRUD-OF-PRODUCT>

Description: A CRUD application for managing product data using ASP.NET. Includes features like create, read, update, and delete — ideal for understanding backend operations.

3. My_portfolio

GitHub link: https://github.com/aminulcste/my_portfolio

Description: A personal portfolio built using Angular and TypeScript. Includes sections such as About Me, Projects, Skills, and Contact — perfect for showcasing developer skills.

4. Cricket

GitHub link: <https://github.com/aminulcste/cricket>

Description: A PHP-based cricket-themed project. It may involve cricket match stats, team details, or content related to cricket — suitable for sports web application practice.

5. Electronic-Shop

GitHub link: <https://github.com/aminulcste/Electronic-Shop>

Description: An electronic shop management system developed using PHP. Handles product listings, basic orders, and possibly inventory — beginner-friendly e-commerce backend.

6. Book-store-management-system

GitHub link: <https://github.com/aminulcste/book-store-management-system>

Description: A book store management system built in PHP. Likely includes book listings, categories, customer management, and order processing — helpful for understanding CRUD-based retail systems.

Professional Skills

HTML, CSS, Bootstrap, JavaScript, ASP.NET MVC, Angular, Typescript, MySQL ,PHP C, C++,Problem Solving

Software Skills

Microsoft Word, Excel, PowerPoint, Email Management, Visual Studio, Codeblocks,

Language Proficiency

- Bangla (*Native*)
- English (*Conversational*)

Hobbies

- Cricket
